Output Screenshots:

Problem-01: Calculator

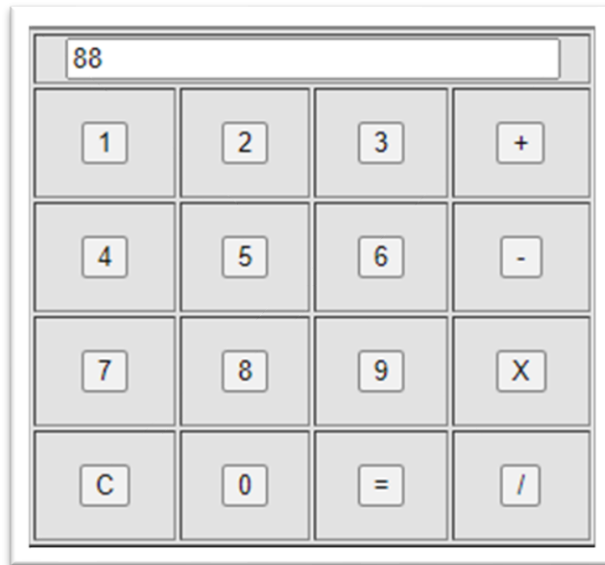

The application opens to a calculator with nothing in the text box besides the placeholder “0”.

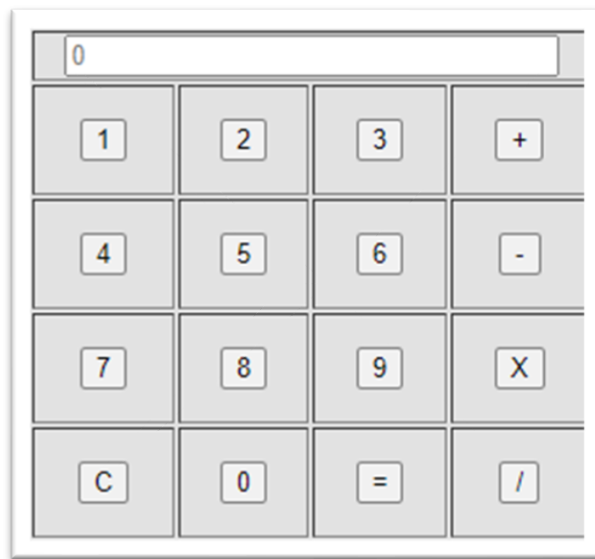

The user enters a simple equation with the buttons

CS 3423 – Mobile/Web Applications

After pressing the “=” button, the calculator parses the input and outputs the result.

When the “C” button is pressed, the textbox is cleared

CS 3423 – Mobile/Web Applications

Problem-02: Word Game

When the game is opened, the user is greeted with the start screen

After pressing the “start game” button, the user sees the game screen

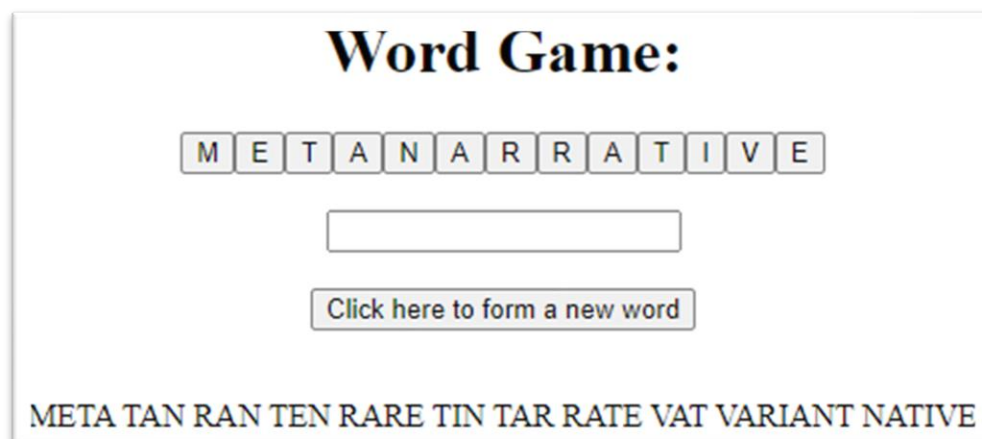

When the user presses the letter buttons, they are greyed out and the letter appears in the box

CS 3423 – Mobile/Web Applications

When the user presses the “Click here to...” button, the letters are reenabled, and the word appears at the bottom of the screen

After a few words, the game will look like this
